Summary

Software Engineer with 2 years building production full-stack web applications (React, Next.js, Node.js, TypeScript) at scale, including AI-powered product features. Ship end to end across UI, APIs, and databases on a multi-tenant micro-frontend platform. Strong CS fundamentals with 1000+ data structures and algorithms problems solved and top competitive-programming ranks.

Technical Skills

Languages: Java, TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Redux, TanStack Query, React Hook Form, Tailwind CSS, Responsive Design, Accessibility (WCAG)
Backend and APIs: Node.js, REST APIs, GraphQL, tRPC, Prisma, Drizzle ORM, PostgreSQL, Zod
AI and GenAI: LLM API integration (OpenAI, Gemini), RAG, Prompt Engineering, Generative AI, TensorFlow
Core CS: Data Structures and Algorithms, Object-Oriented Programming (OOP), Problem Solving, System Design (Fundamentals)
Testing and Tooling: Jest, React Testing Library, Git, GitHub Actions (CI/CD), Vercel, Micro-frontends, Agile

Experience

Software Engineer (Frontend) May 2025 to Present
Osmos Pune, India

- Shipped a permission-gated, configuration-driven scheduling feature enabling hour-level campaign start and end times across Product and Display ad flows, delivered across 3 apps with zero regressions to existing clients.
- Owned the end-to-end onboarding experience for OsmosX, cutting new-user setup time by roughly 35% and improving activation.
- Led the migration of Display, Sponsorship, and in-store campaign flows onto a unified review system, removing duplicated code and standardizing behavior across ad types.
- Built scheduled reporting and an internal Debug Console to track and analyze product and display ad events, reducing event debugging time by around 40%.

Software Engineer Intern (Frontend) Jun 2024 to May 2025
Osmos Pune, India

- Built AI-powered ad creative generation (copy and images) with multi-language support and live generation states, letting advertisers auto-produce campaign creatives across ad formats.
- Shipped configuration-driven campaign features across a multi-tenant platform serving 15+ enterprise brands, adding domain-specific overrides, product catalogs, and audience-targeting rules without code forks.
- Built reusable, validation-driven targeting and data-table components with optimized rendering (useMemo, memoization), improving form reliability and UI performance.

Projects

NewTube, Video Streaming Platform Live · GitHub

- Full-stack streaming app: Next.js and TypeScript frontend, tRPC APIs, PostgreSQL (Drizzle ORM), and Mux transcoding, with playlists, subscriptions, threaded comments, and infinite feeds.

GitSync AI, Code and Meeting Analyzer Live · GitHub

- AI SaaS using LLM APIs and RAG to summarize GitHub commits and answer code Q&A over a repository; added audio transcription and a credit-based billing system.

Jira Clone, Project Management Platform Live · GitHub

- Full-stack SaaS with REST APIs, workspaces, Kanban and calendar views, role-based access control, drag-and-drop tasks, and real-time collaboration.

Education

B.Tech, Computer Science and Engineering Jul 2021 to Jun 2025
Maharashtra Institute of Technology, Pune

- CGPA: 9.33/10

Achievements and Certifications

- 1000+ Data Structures and Algorithms (DSA) problems solved across LeetCode, GeeksforGeeks, CodeChef, and Codeforces; All India Rank 318, Coding Conquest 2024 (PW Skills).
- Frontend Masters: completed Beginner Frontend and React/Next.js Developer paths. IEEE publication, ICETET-SIP 2025 (Automatic Number Plate Detection using TensorFlow and Firebase).
